MATERIALS

- ★ Construction paper
- ★ Scissors
- ★ School glue
- ★ Googly eyes
- ★ Ribbon

PAPER STRIP FISH

It's so easy to make this Paper Strip Fish craft.

CRAFT
WOW TO:

- 1** Sketch a fish head and a fishtail on a piece of construction paper and cut them both out.
- 2** Then stack 2 pieces of construction paper together and cut them into $\frac{1}{4}$ " strips.
- 3** Now it's time to assemble your fish! Lay out the head, then some cut paper strips for the body and finally the tail. If you need to, you can trim some of the paper strips to make the shape of a fish.
- 4** Once you are happy with the placement of all your parts, cut a length of ribbon longer than the fish you have just assembled and glue the paper pieces to the ribbon.
- 5** Let the glue dry. Once it has fully dried, flip your fish over and add a googly eye and any other embellishments you'd like to add to your fish.
