### MATERIALS

- ★ Set of gel pens
- ★ Clean skin

CRAFT  
WOW TO:

## TEMPORARY TATOOS

Turn your skin into your canvas!  
Design your own temporary  
tattoos using gel pens.

Pro Tip: Light colored gel pens work best for this craft. White is great for outlining your designs and really helps the colors pop!

Why gel pens? They are water based so they won't stain clothes and are non-toxic. Also they won't smudge when dry, but wash off instantly with just water.

This works well independently or with a partner. If you have more than one child participating, you can have them take turns coloring on each other and adding to each other's creations.

When it comes to deciding on a design, the sky's the limit! You can make designs with swirls and dots, draw flowers, butterflies or bugs.
