

Tips for TINKERing

TINKER is the place for you to review all your ideas, or WONDERS, and pick one that you and your group will build a Podject around! We call this idea the BIG WONDER!

TINKERing is a three-step process:

- 1** Review the individual ideas you came up with in your WONDER template and choose one to share with your group.

It might be:

- Something you want to research or examine further
- An idea you think you can successfully research or investigate with an experiment, or design and test

- 2** Share the idea with your group. Discuss and compare it to all of the other ideas in the group.

- 3** Agree on one idea to use as the group's BIG WONDER. This must be an idea the group feels it can create a project around.
