

Print & Hide Your Own Cards!

Spread the WOW of caring for our world by creating your own *Planet WOW!* cards!

Print and cut out the cards below. Fold each card in half so the front and back match up, then glue or tape the inside and press it flat. Now comes the fun part—hide your cards in geocaches around your community or in places around the world that make you say, “Wow!”

We Can Make a Change

Are our actions making Earth warmer? Unfortunately, yes! But (and this is a big but) there are so many ways we can help our planet stay cool! A great place to start is by learning! Listen to climate scientists and leaders, and share with your neighbors and family! Don't be afraid to think BIG! Ask your school about electric buses or solar panels. Don't be afraid to think small either! Take public transportation. Unplug unused appliances. When we work together to take care of the planet, the planet will take care of us in return! Grab your sunglasses! The future is on its way, and it's REALLY bright!

Climate Change Impact

Here's a riddle! What's something that's getting hotter? Drier? And wetter? Earth! Our planet is heating up. That means hotter summers, longer droughts, and heavier rainstorms. A hotter planet makes our weather act bonkerballs! You may have experienced extreme weather, like wildfires or floods. Climate change affects all of us, and when we work together to care for the planet, the planet takes care of us too! As a climate crusader, YOU can prepare for the effects of climate change, like making an emergency kit, or planting trees for more shade! It takes all of us to help, but "us" starts with U!
